Directing a Project with PRINCE2®

Duration: 1 Days

This course refers to the international standard ISO 38500 for Corporate Governance of IT together with the Best Practice framework for Portfolio, Programme and Project Management.

A distinguishing feature of PRINCE2®, and one of its main benefits, is that it clarifies the distinction between governing and directing a project.

This course is intended for individuals that need to understand how to perform in roles related to governing and directing projects that are being managed using PRINCE2 methodology.

This course is suitable for:

- Members of the Project Board, Project Executives, Senior Users and Senior Suppliers

- Other roles within Programmes/Projects including Project Assurance, Project Support, Business Change Managers, Programme Managers.

Who Should Attend

This course is designed for two main groups:

- Members of the Project Board, Project Executives, Senior Users and Senior Suppliers

- Other Roles within Programmes/Projects including Project Assurance, Project Support, Business Change Managers, Programme Managers
