

# TOGAF®

## Level 1 & Level 2 Certificate Course

# 9

TOGAF® is a proven enterprise architecture methodology and framework used by the world's leading organisations to improve business efficiency. Enterprise architecture professionals fluent in TOGAF enjoy greater industry credibility, job effectiveness, and career opportunities.

Get certified in TOGAF 9 with this powerful 4-day training program. The course focuses on the practical application of TOGAF in realistic enterprise architecture scenarios and provides thorough coverage of the knowledge needed for Level 1 (Foundation) / Level 2 (Certified) certification.

The course is structured into two 2-day modules Level 1 (Foundation) and Level 2 (Certified). Modules can be taken separately although most prefer to take the combined course.

LEADING PROVIDER OF IT BEST-PRACTICE TRAINING

## Who Should Attend

### Level 1 (Foundation Module )

This module covers the Level 1 curriculum including terminology, structure, basic concepts of TOGAF 9, and core principles of Enterprise Architecture and TOGAF. The course features many examples of architecture deliverables and artifacts. Typical attendance includes:

- Individuals who require a basic understanding of TOGAF 9
- Professionals who are working in roles associated with an architecture project such as those responsible for planning, execution, development, delivery, and operation
- Architects who are looking for a first introduction to TOGAF 9
- Business Analysts, Systems Analysts and Technical Analysts who want to career develop into enterprise architecture
- Enterprise architects who want to achieve Level 2 certification. The Foundation Level is a mandatory pre-requisite.

### Level 2 (Certified Module)

Practitioner Module This module focuses on the practical application of the TOGAF 9 framework with the emphasis on application and analysis. Typical attendance includes:

- Individuals who require a deeper understanding of TOGAF 9 e.g. System Integrators, Business and IT Developers, CIOs and IT Managers, Program and Project Leaders, IT Specialists, Architects
- Professionals who are working in an organisation where TOGAF 9 has been adopted and who need to participate in architecture projects and initiatives
- Architects who will be responsible for developing architecture artifacts
- Architects who wish to introduce TOGAF 9 into an architecture practice
- Business Analysts, Systems Analysts and Technical Analysts who want to career develop into enterprise architecture
- Enterprise architects who want to achieve a recognised qualification to demonstrate their detailed knowledge of TOGAF 9

## Learning Objectives

### Level 1 (Foundation)

- The basic concepts of Enterprise Architecture and TOGAF
- The core concepts of TOGAF 9
- The key terminology of TOGAF 9
- The ADM cycle and the objectives of each phase, and how to adapt and scope the ADM
- The concept of the Enterprise Continuum; its purpose and constituent parts
- How each of the ADM phases contributes to the success of enterprise architecture
- The ADM guidelines and techniques
- How Architecture Governance contributes to the Architecture Development Cycle
- The concepts of views and viewpoints and their role in communicating with stakeholders
- The concept of building blocks
- The key deliverables of the ADM cycle
- TOGAF reference models
- The TOGAF certification program.

### Level 2 (Certified)

- How to apply the ADM phases in development of an enterprise architecture
- How to apply Architecture Governance in development of an enterprise architecture
- How to apply the TOGAF Architecture Content Framework
- How to apply the concept of Building Blocks
- How to apply the Stakeholder Management Technique
- How to apply the TOGAF Content Metamodel
- How to apply TOGAF recommended techniques when developing an enterprise architecture
- The TOGAF Technical Reference Model and how to customise it to meet an organisation's needs
- The Integrated Information Infrastructure Reference Model
- The content of the key deliverables of the ADM cycle
- How an enterprise architecture can be partitioned to meet the specific needs of an organisation
- The purpose of the Architecture Repository
- How to apply iteration and different levels of architecture with the ADM
- How to adapt the ADM for security
- SOA as a style of architecture
- The role of architecture maturity models in developing an enterprise architecture
- The purpose of the Architecture Skills Framework and how to apply it within an organisation
- The key deliverables of the ADM cycle
- TOGAF reference models
- The TOGAF certification program

## Course Contents

### Foundation Module LEVEL 1 / 2 DAYS

- 1 Course Introduction
- 2 Enterprise Architecture – An Introduction
- 3 TOGAF 9 – An Introduction
- 4 The Architecture Development Method
- 5 Adapting TOGAF to the Context
- 6 Architecture Principles and Requirements
- 7 Architecture Vision
- 8 Risk Management
- 9 Enterprise Integration
- 10 Enterprise Continuum and Architecture Repository
- 11 Architecture Patterns
- 12 Architecture Content Framework
- 13 Technology Architecture
- 14 Building Organisational Capability
- 15 Architecture Governance
- 16 Exam Preparation Guide

### Certified Module LEVEL 2 / 2 DAYS

- 1 Course Introduction
- 2 The Architecture Development Method
- 3 Adapting TOGAF to the Context
- 4 Architecture Principles and Requirements
- 5 Architecture Vision
- 6 Stakeholder Management and Risk Management
- 7 Security Architecture
- 8 Enterprise Integration and Service Oriented Architecture
- 9 Enterprise Continuum and Architecture Repository
- 10 Architecture Content Framework
- 11 Business Architecture Phase
- 12 Information Systems Architectures
- 13 Technology Architecture
- 14 Transition Planning
- 15 Building Organisational Capability
- 16 Architecture Governance
- 17 The Architect
- 18 Exam Preparation Guide

## Certificate Exam

The TOGAF exams are administered by the Open Group at a Pearson Vue Test Centre.

- Candidates will receive an exam voucher after the course.
- The exam is taken AFTER the course, at a suitable time.
- Vouchers are valid for 12 months.

## Prerequisites

There are no formal prerequisites for the Foundation level. For Certified level it is expected that participants have knowledge at least equal to what is covered in the Foundation module.

*Note: A pass in both Level 1 and Level 2 exams is necessary before the Certified Level 2 certificate can be awarded.*
